Gloria Carephone

CareTech has been developing carephones for over 25 years and we feel confident in saying that we understand care telephony well. Very well in fact. We develop our products and solutions in collaboration with our customers. This is one of the reasons why CareTech carephones are so easy to install and use.

Gina is a practical, well-designed, mains-operated carephone that is ideal for use in the individual’s own home. A choice of 12 different accessories can be connected. When the alarm is transmitted by telephone, Gloria provides information using synthesized speech, which ensures effective alarm reception and provides an excellent basis for quick and appropriate response. The built-in event log also aids in monitoring the quality of care. A wide choice of accessories, including alarm buttons, bedside alarms and door alarms can be connected to Gloria to create the ideal solution for any situation.
Gloria Carephone

With just a single press on the alarm button the Gloria Carephone alerts care staff, the municipal alarm computer or a professional external alarm centre. The person who takes the alarm call receives information in the form of synthesized speech and can then talk directly to the person who raised the alarm and take suitable action. Wireless accessories, such as CareTech’s Erik and Elliot radio alarm buttons, smoke alarms, bedside alarms, door alarms, etc., can easily be linked to the carephone.

- Speech synthesis.
- Two inputs and one relay output.
- Built-in real-time clock with year, date, day and time display to the second.
- Supports care monitoring, including i-care.
- Buttons for alarm, presence and reset.
- Facility for wireless remote control.
- Alarms can be forwarded to manned/unmanned alarm centres, landline telephones and mobile telephones.
- Callback function.
- Ability for home care staff to send assault alarm using a special alarm button, without previous programming.
- Mains and line fault detection.
- Ability to control volume from a landline telephone, mobile telephone or alarm centre.
- Programming can be carried out from a landline telephone, mobile telephone, programming unit, CareTech remote programming or from a PC with appropriate software.
- Environmentally friendly batteries.
- Can easily be upgraded and expanded with new services and features.
- Supplied complete with Erik radio alarm button.

Technical data

- **Power supply**: Power adapter 230/10VAC, 280 mA
- **Battery, central unit**: 4 x NiMH (1.2 V 1300 mAh rechargeable)
- **Runtime**: 3–12 months with continuous operation (approx. 5 minutes connection daily)
- **Battery alarm**: Triggered automatically at central unit if battery voltage is low
- **Speech communication**: Duplex and simplex
- **Radio**: Long-term station keeping, 868.35 MHz
- **No. of radio transmitters**: Up to 9 radio accessories
- **Inputs/outputs**: 2 opto-isolated inputs, 1 relay output
- **Dialling method**: DTMF (touch tone) or pulse
- **Alarm receiver**: Up to 6 alarm receivers can be programmed. Max. 15 digits in telephone number or 12 digits in alarm code
- **Protocol**: Smart Call, Antenna, Attendo TT90/CPC, Vitalcall/Tunstall and landline telephone
- **Dimensions**: 215 x 125 x 45 mm
- **Article number**: 1-8400-210
- **Approval**: CE-marked. Complies with R&TTE 1999/5/EC requirements for the following standards:
  - **SRD Radio**: EN 300 220-3 V1.1.1 (2000-09)
  - Manufactured in accordance with the new RoHS directive, 2002/95/EC
  - (Restriction of the Use of Certain Hazardous Substances in Electrical and Electronic Equipment)
